

Green Rises Lumi Lune 20mg Pastilles

Consumer Medicine Information (CMI) summary

The [full CMI](#) on the next page has more details. If you are worried about using this medicine, speak to your doctor or pharmacist.

▼ This medicine is new or being used differently. Please report side effects. See the [full CMI](#) for further details.

1. Why am I using Lumi Lune 20mg pastille?

Lumi Lune 20mg pastille contains the active ingredient delta-9-tetrahydrocannabinol (THC). Lumi Lune 20mg pastille is not approved for any specific indication and should only be used to treat specific conditions or symptoms authorised by your doctor.

For more information, see Section [1. Why am I using Lumi Lune 20mg pastille?](#) in the full CMI.

2. What should I know before I use Lumi Lune 20mg pastille?

Do not use if you have ever had an allergic reaction to cannabis or any of the ingredients listed at the end of the CMI.

Talk to your doctor if you have any other medical conditions, take any other medicines, or are pregnant or plan to become pregnant or are breastfeeding.

For more information, see Section [2. What should I know before I use Lumi Lune 20mg pastille?](#) in the full CMI.

3. What if I am taking other medicines?

Some medicines may interfere with Lumi Lune 20mg pastille and affect how it works.

A list of these medicines is in Section [3. What if I am taking other medicines?](#) in the full CMI.

4. How do I use Lumi Lune 20mg pastille?

- Follow all directions given to you by your doctor or pharmacist carefully. They may differ from the information contained within this leaflet.
- If you do not understand the instruction on the pharmacist dispensing label, ask your doctor or pharmacist for help.
- Your doctor will provide you with a treatment schedule based on your needs. Always use Lumi Lune 20mg pastille exactly as your doctor has told you.
- Lumi Lune 20mg pastille can be taken before or after food, as advised by your doctor. Using Lumi Lune 20mg pastille on an empty stomach may increase its effects.
- Only a doctor can start you on treatment with Lumi Lune 20mg pastille. Your doctor will assess you from time to time to see if you should continue taking Lumi Lune 20mg pastille.

More instructions can be found in Section [4. How do I use Lumi Lune 20mg pastille?](#) in the full CMI.

For more information, see Section [5. What should I know while using Lumi Lune 20mg pastille?](#) in the full CMI.

6. Are there any side effects?

All medicines can have side effects. If you do experience any side effects, most of them are minor and temporary.

You are more likely to get side effects when you start your treatment. They are usually mild and wear off within a few hours. However, some side effects may need medical attention.

Do not be alarmed by these lists of possible side effects. You may not experience any of them. Ask your doctor or pharmacist to answer any questions you may have.

Less serious side effects:

- Dry mouth
- Tiredness
- Dizziness

Serious side effects:

- Reduced physical control
- Severely impaired mental state
- Allergic reaction
- Rapid heartbeat

For more information, including what to do if you have any side effects, see Section [6. Are there any side effects?](#) in the full CMI.

This medicine is subject to additional monitoring. This will allow quick identification of new safety information. You can help by reporting any side effects you may get. You can report side effects to your doctor, or directly at www.tga.gov.au/reporting-problems.

Green Rises Lumi Lune 20mg Pastilles

Active ingredient(s): Each pastille contains 20mg delta-9-tetrahydrocannabinol (THC)

Consumer Medicine Information (CMI)

This leaflet provides important information about using Lumi Lune 20mg pastille. **You should also speak to your doctor or pharmacist if you would like further information or if you have any concerns or questions about using Lumi Lune 20mg pastille.**

Where to find information in this leaflet:

- [1. Why am I using Lumi Lune 20mg pastille?](#)
- [2. What should I know before I use Lumi Lune 20mg pastille?](#)
- [3. What if I am taking other medicines?](#)
- [4. How do I use Lumi Lune 20mg pastille](#)
- [5. What should I know while using Lumi Lune 20mg pastille?](#)
- [6. Are there any side effects?](#)
- [7. Product details](#)

1. Why am I using Lumi Lune 20mg pastille?

Lumi Lune 20mg pastille contains the active ingredient delta-9-tetrahydrocannabinol (THC).

Lumi Lune 20mg pastille is not approved for any specific indication and should only be used to treat specific conditions or symptoms prescribed by your doctor.

Ask your doctor if you have any questions about why Lumi Lune 20mg pastille has been prescribed to you.

Lumi Lune 20mg pastille is an alternative therapeutic option when medicines and lifestyle treatments have not been beneficial. The therapeutic benefit of Lumi Lune 20mg pastille may vary between individuals.

This medicine is only available with a doctor's prescription.

2. What should I know before I use Lumi Lune 20mg pastille?

Warnings

Always check the ingredients to make sure you can use this medicine.

Do not use Lumi Lune 20mg pastille if:

- you are allergic to cannabis or cannabis-based medications or any of the ingredients listed at the end of this leaflet.
- you are pregnant, planning to become pregnant, or breastfeeding.

Check with your doctor if you:

- have any other medical conditions
- have allergies to any other medicines
- have a personal or family history of psychotic, mood, or anxiety disorders
- have significant liver function abnormalities
- have a substance use disorder (abuse, dependence) to alcohol, opioids, benzodiazepines, or stimulants
- take any medicines for any other condition

During treatment, you may be at risk of developing certain side effects. It is important you understand these risks and how to monitor for them. See additional information under Section [6. Are there any side effects?](#)

Pregnancy and breastfeeding

Check with your doctor if you are pregnant or intend to become pregnant.

Talk to your doctor if you are breastfeeding or intend to breastfeed.

3. What if I am taking other medicines?

Tell your doctor or pharmacist if you are taking any other medicines, including any other cannabis products, or vitamins or supplements that you buy without a prescription from your pharmacy, supermarket or health food shop.

You should also tell any health professional who is prescribing a new medication for you that you are taking Lumi Lune 20mg pastille.

If you see a different doctor or go into hospital, let them know all the medicines you are taking.

Some medicines may interfere with Lumi Lune 20mg pastille and affect how it works.

Medicines that may increase the effect of Lumi Lune 20mg pastille include:

- sedatives or sleeping pills
- certain painkillers (e.g., opioids)

Medicines that may reduce the effect of Lumi Lune 20mg pastille include:

- some anticonvulsants (e.g., carbamazepine)
- St John's Wort

Check with your doctor or pharmacist if you are not sure about what medicines, vitamins or supplements you are taking and if these affect Lumi Lune 20mg pastille.

4. How do I use Lumi Lune 20mg pastille?

How much to take / use

Your doctor will work with you to decide the dose that best suits you and your symptoms. Dosage may need to be changed by your doctor to determine where the benefits are maximised and unwanted effects are minimised.

Always follow the instructions from your doctor.

When to take / use Lumi Lune 20mg pastille

Your doctor will work with you to decide how often to take the medicine that best suits you and your symptoms.

Always follow the instructions from your doctor.

How to administer Lumi Lune 20mg pastille

- This product should be administered orally, as recommended by your doctor or pharmacist.

If you forget to use Lumi Lune 20mg pastille

Lumi Lune 20mg pastille should be used at the times directed by your doctor. Ask your doctor for the acceptable dosage time window.

If you are unsure, or if it is almost time for your next dose, skip the dose you missed and take your next dose when you are meant to.

Do not take a double dose to make up for the dose you missed.

If you use too much Lumi Lune 20mg pastille

If you think that you have used too much Lumi Lune 20mg pastille, you may need urgent medical attention.

You should immediately:

- phone the Poisons Information Centre (**by calling 13 11 26**), or
- contact your doctor, or
- go to the Emergency Department at your nearest hospital.

You should do this even if there are no signs of discomfort or poisoning.

5. What should I know while using Lumi Lune 20mg pastille?

Things you should do

- Take Lumi Lune 20mg pastille as your doctor has prescribed.
- Avoid or limit the use of alcohol while taking Lumi Lune 20mg pastille.

Call your doctor straight away if you:

- Are pregnant or become pregnant while taking Lumi Lune 20mg pastille.
- Experience any serious side effects (Refer to Section 6).
- Notice your symptoms don't improve or get worse.
- Change any of your other medications or are about to start using any new medication

Remind any doctor, dentist or pharmacist you visit that you are using Lumi Lune 20mg pastille.

Things you should not do

- Do not stop using this medicine suddenly without telling your doctor.
- Do not give your medicine to anyone else, even if they have the same condition as you.

Travelling overseas with Lumi Lune 20mg pastille

- Check that it is legal for you to take Lumi Lune 20mg pastille into any countries you are travelling to and countries you are travelling through.
- Lumi Lune 20mg pastille is a Controlled Drug in Australia, and its legal status will vary between countries.

Driving or using machines

Lumi Lune 20mg pastille may make you feel drowsy, sleepy or dizzy.

Do not drive or operate machinery while taking Lumi Lune 20mg pastille.

Check with your doctor when it is safe to drive after taking Lumi Lune 20mg pastille.

Drinking alcohol

Tell your doctor if you drink alcohol.

Combining Lumi Lune 20mg pastille and alcohol may increase their effects.

Looking after your medicine

- Store Lumi Lune 20mg pastille in its original packaging
- Store in a cool (less than 25°C), dry place away from moisture, heat, or sunlight
- Do not store in the bathroom or near a sink
- Do not store in the car or on windowsills

Keep out of reach of children and pets.

Getting rid of any unwanted medicine

If you no longer need to use this medicine or it is out of date, take it to any pharmacy for safe disposal.

Do not use this medicine after the expiry date.

6. Are there any side effects?

All medicines can have side effects. If you do experience any side effects, most of them are minor and temporary. However, some side effects may need medical attention.
